

Building a world of simplicity for humanity

SECURITY FENCING AND ALARM SYSTEM

INTRODUCTION

Security in African has never been much vital up until now, the pressing challenges facing individuals and businesses cannot be over looked. Petos in its bid of securing Africa has redefined the approach in solving these challenges alongside the clients.

PETOS BRAND

PETOS brands are design around the concept of self sustenance in the African environment. Considering the fact that we live in a developing continent which is still growing its quality energy generation and consumption, we decided to design our products to function at its optimum capacity even in spite of the power fluctuation.

Our jobs are focused on software, hardware engineering, I.T consulting and computer related services. Our services to our clients offer new and interesting ways in how to approach problems in a technical manner and how to optimize time in tackling problems whatsoever and offer quick solution even with our home and office automation services. Moreover , our skilled team is well-experienced and equipped to handle any technical challenges, ensuring adaptability to the fast-paced nature of the 21st century. We relate with our society to offer new insights on our environments so as to design products and services which are valid for today's world.

BUSINESS CONCEPT

We analyse customer needs

We design the services package together with the customer.

We design the services delivery system based on the needs and wants of the customer.

We create an identity together with the customer at the local sites.
